The Little Book
of
Python

This ebook is formatted to fit on a phone screen.

Contents

List of Figures

Foreword

This book is inspired by The Little Book of Deep Learning by prof. Francois Fleuret and aims to develop a guide on python with the focus on machine learning and deep learning fundamental techniques with PyTorch or python in general. This book is currently a collective effort, open-source and welcomes contribution from authors and programmers.

Part I

History

Chapter 1

Introduction

Guido van Rossum born 31 January 1956 is a Dutch programmer and the creator of the Python programming language. Python programming language is comparatively underrated as it supports programming paradigms such as structured, object-oriented and functional. It has support from multiple organizations writing and maintaining the collectively large standard and user function libraries.

Chapter 2

Deep learning fundamentals
